

WEST MAUI

WEST MAUI COMMUNITY PLAN

Community Profile Transportation

Only 12% of West Maui resident workers carpooled, which was less than the 14% county and statewide rates, but greater than the 10% average rate for American workers. West Maui workers walked to work at double (8%) the county rate of 4%, while the statewide rate was 5% and the national rate was only 3%. (ESRI, 2017)

West Maui resident workers spent much less time driving to work than workers located in other parts of the county. This is likely due to the fact that 59% of them commuted less than 10 miles to work. Additionally, 74% either worked at home or drove less than 20 minutes to work, compared to only 58% of all of Maui County and 42% for the state.
