Mayor

KEKUHAUPIO R. AKANA
Managing Director

OFFICE OF THE MAYOR
COUNTY OF MAUI
200 SOUTH HIGH STREET
WAILUKU, MAUI, HAWAI'I 96793
www.mauicounty.gov

The Office of Innovation and Sustainability (OIS), under the Office of the Mayor offers competitive reimbursable grants for programs, projects, and organizations that will provide a positive and progressive environmental and social impact within the County of Maui.

Non-profit and for-profit organizations are welcome to apply for these grant funds. County grant applications relating to Sustainability, Natural Resource Management, Climate Action, Renewable Energy, Energy Efficiency, Electrification of Transportation and Green Building & Resilient Housing are now submitted directly to the Office of Economic Development.

Eligible Projects

OIS provides grants for programs, projects, and events that promote and nurture environmental efforts and innovative initiatives within Maui County consistent with the community's needs and priorities. Projects must demonstrate a direct benefit to Maui's environment through activities in priority target areas including culture, environmental protection, conservation, green building, energy, and sustainability. Specific criteria include overall benefit to the people of Maui County, population served, and impact to Maui communities. These funds are intended to be a catalyst for innovation, sustainable growth, and capacity building of local organizations towards economic self-sufficiency: and not for long term dependence on County funding sources.
